

Free workshop: New Calflora Tools for Invasive Plant Tracking and Managing

Classroom portion Wednesday June 20, 12:30 - 5pm

Optional hike portion Thursday June 21, 9am - 11:30am

Description: This course will be a combination of lecture and field exercises on importing, exporting, and using Calflora data. We will discuss applications of collecting data in the field using Calflora apps for Android and iOS devices, creating history stacks to track changes over time, and mapping. Much of the class will take place in the meeting room at the Lahontan Regional Water Quality Board, 971 Silver Dollar Avenue, South Lake Tahoe, CA, 96150.

Participants will learn:

- Applications of Calflora in the field and at work
- How Calflora data are used for plant mapping projects
- How to collect and share plant data using Calflora tools
- How to document data using customized forms and offline map caches

Who should attend?

Landowners and managers, on-the-ground crews, trail/park staff, volunteers, and the public. This workshop is free thanks to the funding provided by Tahoe Fund, Calflora, and One Tam, but [click here to register](#).

Agenda

12:30pm Sign-in

1:00 Introductions

1:15 Calflora intro & tools

2:15 Tahoe WMA guest speaker Svetlana Yegorova

2:30 Break

2:30 Hands-on using app and Calflora website

3:30 Calflora data: editing, uploading, exporting

4:00 Creating history stacks to track change over time (restoration work and/or invasives)

4:15 One Tam guest speaker Rachel Kesel

4:30 Creating plant surveys in Calflora

5 Final questions and adjourn

Hike on June 21st, 9am

Apply your new mapping skills on a hike led by Rachel Kesel, One Tam Conservation Management Specialist. Location details will be provided on June 20th [click here to register](#).
